

Description

[The Pilot Light]

DETAILED DESCRIPTION

A LIGHT EMITTING DISPLAY WHICH INDICATES TACHOMETER VALUES IN AN EXTERNALLY VISIBLE APPARATUS. AN AUTOMOBILE WHOSE ENGINE IS RUNNING BUT IDLE WILL DISPLAY THE AMBER YELLOW COLOR. WHEN DRIVER ACCELERATES THIS PILOT LIGHT GLOWS GREEN. THIS CONCEPT WAS INSPIRED BY THE STATUS LIGHT FOUND ON COMPUTER MONITORS. EXPANDING ON THIS CONCEPT, THE RED LIGHT COULD REPRESENT NEAR TO FULL THROTTLE ACCELERATION. AN ADDITIONAL SERENDIPITOUS APPLICATION IS THE CAPABILITY TO NOW CREATE A BLINKING GREEN LIGHT WHICH WOULD SERVE AS A USER SELECTED OPTION WHICH ACKNOWLEDGES (VIA THIS BLINKING GREEN LIGHT) YOU ARE ANTICIPATING SOMEONE'S DESIRE TO PASS YOU. ONE FINAL BENEFIT TO THIS PILOT LIGHT/ENGINE RUNNING LIGHT CONCEPT IS THAT IF IT'S NOT LIT -THE ENGINE HAS STALLED.[NEW SECTION TITLE]
